

## Install FMSsoft 7.0 for AutoCAD Mechanical 6 Power Pack

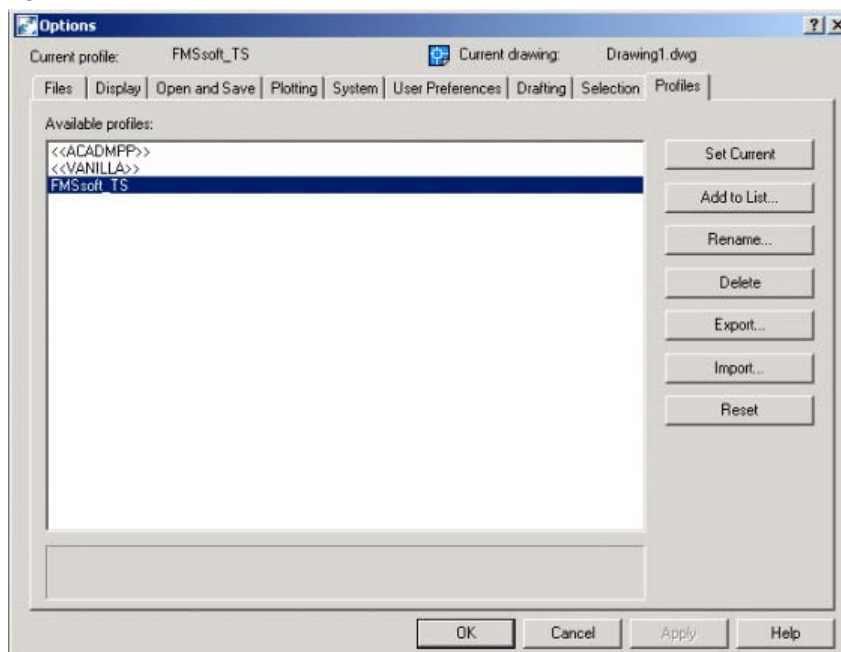

### Step 1:

Uninstall older FMSsoft installations.

Start AutoCad application and activate a normal profil. For this goto menu ,Assist' -,AutoCAD-Options':

In the following dialog open the tab ,Profiles'

Set <<ACADMPP>> to ,Current' and close with ,OK'

**Step 2:**

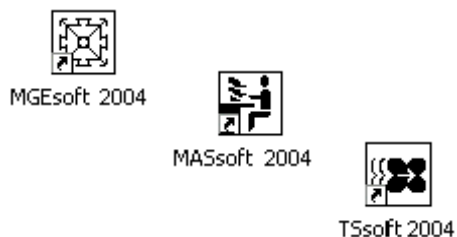

Insert the FMSsoft CD into your CD-Rom drive. If no autorun is activ please start ‚Start.exe‘. The following

window will appear:

To install FMSsoft click to ‚Installation‘ and follow the Installation instructions.

Start FMSsoft with the help of the buttons on your desktop

Or via  Start Programme\Bosch Rexroth\FMSsoft.

**Notice:** AutoCAD 2004 has for different users different ACAD profiles. FMSsoft only runs without mistake if all users who use FMSsoft have 'Poweruser' authorisations after the installation through a administrator. All users must start AutoCad 2004 once before they use FMSsoft the first time.
