

# Calculation Software for Guide Rail Systems

## Learning Target

Participant know and understand:

- Calculation of linear axis containing ball or roller rails using a software

## Contents

- Software for calculating and dimensioning of guided rails and ball screw drives
- Examples

## Group of Participants

- Project engineers, design engineers

## Duration

1 day

## Dates

German, English  
on request

## Location of Training

Schweinfurt / Germany

## Information and Registration

Bosch Rexroth AG  
Linear Motion and Assembly  
Technologies  
Heike Olschewski  
Postfach 11 64  
D-97419 Schweinfurt  
Germany
