**Spare Parts Price List 2007** Update

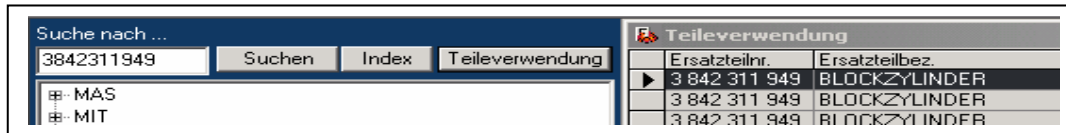

The spare parts price list is provided for our sales partners on the CD-ROM.  
A code must be used to activate the spare parts price list.  
You may request the code at the following e-mail address:

BRS.SVL@boschrexroth.de

## BRL SIS (Sales Information Service)

The following useful functions are also included on the spare parts CD:

- Modified search function with parts application and index

- Improved variant selection for components with three-phase motors and mounting gears
- Switching from center to side view for graphics on components with different gear motor mountings
- Printable graphics and parts lists
- Creation of order lists; i.e. by double-clicking selected parts, they are placed in a parts list and converted as needed in EXCEL or PDF formats.
- Order lists can be sent directly by e-mail
- Graphical zoom
- Selection between main and supplementary drawings partially available
- Assemblies are shown in red in the graphics; the next level of the framed position number can be opened with a double-click.

### About installation:

Please make sure to deinstall the older spare parts list versions before installation.

Example: Start/Programs/Bosch Rexroth/MTparts/Uninstall.

The new installation takes place via X:\setup.exe. Full or minimal installation options are available.

**PDFCreator** also located on the CD.

The following languages may be selected: De/En/Fr/Es/It

The CD contains formulas for calculating the length of toothed belts for current belt sections e.g.: 3 842 999 899 BS1/T or 3 842 999 716 BS2. Manufacture date must be entered.

### General:

The new version of **MTparts 3.0** provides you with the optimum tool for maintenance and service on our components and systems.

It especially facilitates the identification of spare parts, as well as their planning and ordering.

Please pass on the CD to your system builders and end customers.  
Yet another clear demonstration of our competitive advantages.
