New Panel Mount Gusset

The new Panel Mount Gusset (1) and Variofix Block Intermediate Support (2) are now available from Bosch Rexroth. The threaded Panel Mount Gusset provides a convenient way to attach panels and allows those panels to be flush mounted or surface mounted in their frame. Like the standard Gusset, the Panel Mount Gusset has alignment tabs and fastens quickly to the profile.

The Panel Mount Gusset and the Variofix Intermediate Support are available in three versions. One for the 20 series profile, one for the 30 series profile, and a third which works with either the 40 or 45 series profiles.

When using the Variofix Intermediate Supports, be aware of their orientation. The orientation will change depending on the panel mounting option as shown at A + B in the illustration.

Both items are in stock and available for immediate delivery.
