Web Based Training

Electric Drives and Controls

Today, independent learning at the computer is an integral part of the knowledge transfer.

The freedom to choose time and place, unlimited repeatability, individual speed of learning and interactive learning contents make this method an indispensable studying tool.

Prerequisites:

PC with Internet access and email address for personal log-in to the Bosch Rexroth study server.

You'll receive your access code for log-in after receipt of the order. Your eLearning experience can now begin.

Training times:

During the license period, the recorded training contents are permanently available.

Advantages:

- ▶ Flexible study time
- ▶ Individual speed of learning
- ▶ Repeatability
- ▶ No travel costs
- ▶ No capacity or scheduling conflicts

Recorded Training Modules

Recorded training modules include:

- ▶ One year access to recorded classes
- ▶ Associated software when applicable
- ▶ Presentation(s)
- ▶ Course tests
- ▶ Certificate of completion
- ▶ A two hour live web based follow-up interactive Q & A session with a training instructor.
 - This session will be recorded and posted as part of the twelve month module access
- ▶ Manuals with hands on exercises

Some classes will afford students an option to purchase access to our remote lab where they can control hardware demos remotely and view them in operation via web cams.

2011 Price List for Recorded Classes (USA)

License Type	For One Year Access
Up to 6 Registrants	\$3,000
12 Registrants	\$5,000
25 Registrants	\$10,000
50 Registrants	\$20,000
100 Registrants*	\$40,000
500 Registrants**	\$60,000

* Six additional months of access will be provided to the 100 registrants plan.

** Six additional months of access will be provided to the 500 registrants plan and a second course will also be provided for the same time period.

Online Live Interactive Training Modules

Online live interactive training modules include:

- ▶ Interactive web-live training with a Bosch Rexroth Instructor
 - Sessions will be recorded
 - Twelve month access to recordings
- ▶ Presentation(s)
- ▶ Course tests
- ▶ Manuals with hands on exercises
- ▶ Certificate of completion
- ▶ Video view of operating hardware demos

Some classes will afford students to remotely access software and associated hardware demos (remote lab).

Courses are designed for sessions lasting 2 hours per day, and can run for five consecutive days. Course attendance is limited to 24 attendees.
