

D&C Scheme Editor 4.1

Release Notes

1 New Features / Changes in Version 4.1

1.1 Model View

- Support of the middle mouse button to move the sheet.
- SVG files generated by the SVG export can be shown in Firefox without Adobe SVG Viewer plug-in.
- Texts that are included in a group, e.g. a complete circuit diagram of the ICS configurator, are scaled with the group.

1.2 Parts List

- Context menu command **Publish as PDF...** is available.

1.3 Manual

- Example for air consumption has been updated.
- Section **Establish connection...** has been removed.

2 Bug fixes in Version 4.1

2.1 Title Block Template

- An assigned title block template was not taken when printing or exporting a sheet.
- A user defined title block was replaced by standard title block when loading the model.
- Inserting an image in a title block template raised an exception when saving the changes.

2.2 Parts List

- The amount of the same accessories of combined symbols was not added correctly.
- The exported material numbers in a XLS file for import into Excel were detected as a number and the leading zeros are removed automatically.
- Export of parts list raised an exception.

2.3 User Defined Fields

- User settings for the layout of the library were not loaded correctly.
- Under certain circumstances some settings in the options for the presentation of the library raise an exception.

2.4 Setup

Setup failed to associate a file type with a program when the user did not have administrator rights.

3 Transfer user-defined settings

The user-defined settings are stored in version-dependent subdirectories and are available here:

Windows XP:

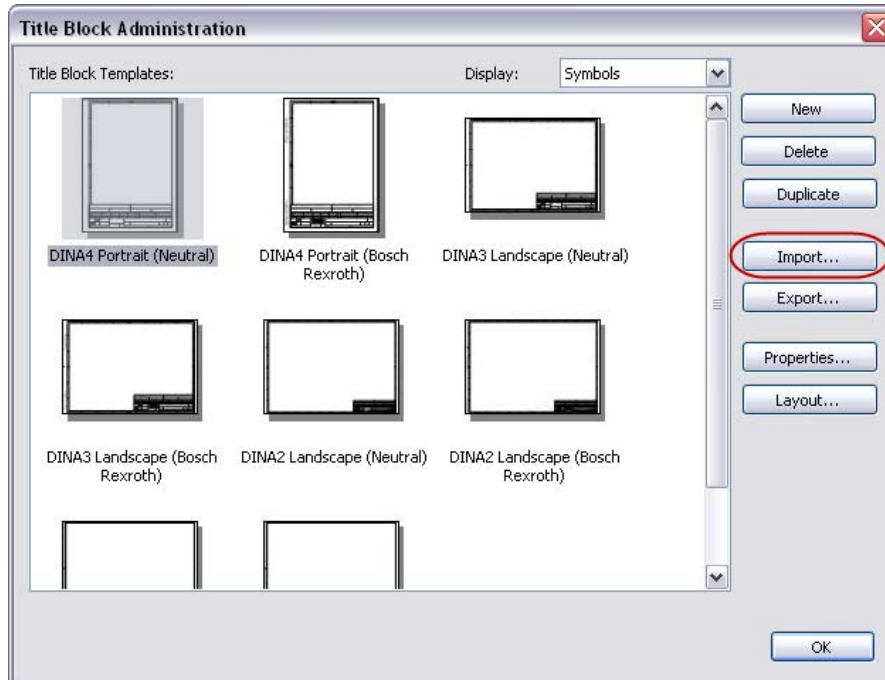

```
C:\Documents and Settings
  |- <username>
    |- Application Data
      |- Bosch Rexroth AG
        |- D&C Engine
          |- SEdit
            |- 04V00
            |- 04V01
```

Windows 7

```
C:\Users
  |- <username>
    |- AppData
      |- Roaming
        |- Bosch Rexroth AG
          |- D&C Engine
            |- SEdit
              |- 04V00
              |- 04V01
```

3.1 Title Blocks

Title blocks created with version 3.0 can be imported clicking the **Import...** button in the Title Block Administration dialog.

The title blocks of version 4.0 are stored in this location:

Windows XP

```
C:\Documents and Settings
  |- <username>
    |- Application Data
      |- Bosch Rexroth AG
        |- D&C Engine
          |- SEdit
            |- 04V00
              |- TitleBlocks
```

Windows 7

```
C:\Users
  |- <username>
    |- AppData
      |- Roaming
        |- Bosch Rexroth AG
          |- D&C Engine
            |- SEdit
              |- 04V00
                |- TitleBlocks
```

3.2 Favorites

When a favourites list has been created in version 4.0, it can be used in version 4.1 by copying the files

```
DCE.Library.View.FFM.xml
DCE.Library.View.FD.xml
DCE.Library.View.FF.xml
```

from directory

Windows XP

```
C:\Documents and Settings
  |- <username>
    |- Application Data
      |- Bosch Rexroth AG
        |- D&C Engine
          |- SEdit
            |- 04V00
```

into the directory

```
C:\Documents and Settings
  |- <username>
    |- Application Data
      |- Bosch Rexroth AG
        |- D&C Engine
          |- SEdit
            |- 04V01
```

Windows 7

```
C:\Users
  |- <username>
    |- AppData
      |- Roaming
        |- Bosch Rexroth AG
          |- D&C Engine
            |- SEdit
              |- 04V00
```

into the directory

```
C:\Users
  |- <username>
    |- AppData
      |- Roaming
        |- Bosch Rexroth AG
          |- D&C Engine
            |- SEdit
              |- 04V01
```
