Java Runtime Environment (JRE) from Oracle

Properties

• Java package for Rexroth IndraControl VE and VP
• Java package for Rexroth IndraControl XM

The platform-independent programming language Java enables the provision of software products that can be used independently of the operating system and device platform. One such product is, for example, the Rexroth WebConnector.

Java-based software packages from Rexroth can be used on the following target devices:
- Rexroth IndraControl VE embedded HMI devices (based on Windows)
- Rexroth industrial PC IndraControl VP
- Rexroth IndraControl XM control hardware
- Customer-specific PCs (based on Windows, Linux, OS X) and
- Customer-specific embedded PCs or mini PCs, such as Raspberry Pi

Rexroth provides a suitable Java license for all relevant Rexroth IndraControl V and IndraControl XM devices when the device is ordered. Rexroth does not provide any Java licenses for devices from other manufacturers.

The current software can be downloaded directly from the software manufacturer's website (Oracle Corporation): www.java.com
