Long Life Service Contract (LLS)

REMAN+

Retrofit

- ▶ For contract customers, repair or spare parts supply and technical support are ensured, alternatively retrofit
- ▶ If not, repair and/or spare parts supply and technical support according to availability

Long Life Service Contract (LLS)

The LLS ensures the service availability of the used products and solutions beyond the agreed service period. Bosch Rexroth stocks all necessary materials and documents and supplies the necessary know-how.

REMAN

The components are overhauled according to certified factory standards and brought into a mint condition with a new warranty. All wearing parts are replaced, software and hardware updates are implemented.

REMAN+

Corresponds to REMAN in technical terms, but including extension of service availability.

Retrofit

Retrofit is the replacement of old control and drive components by current Rexroth products.
