

FiFo station

00137599

- ▶ Standardized delivery routes for clearly organized and highly transparent production operations
 - ▶ Clear visualization to help minimize inventories
 - ▶ Implementation of the kanban principle
 - ▶ Structured material supply system with efficient, well-defined processes to help find required materials fast
 - ▶ Easy tracing of faults and malfunctions through observation of the FiFo principle
 - ▶ Modular system lets you adapt the layout to your needs and to your space
- ▶ Flow rack systems can be integrated to save space. The flow rack is set up on the FiFo tracks, light parts are stored in the flow rack and heavy parts on floor rollers or material shuttles in the FiFo station.
 - ▶ Information supplied by attaching information boards
 - ▶ A transverse profile can be installed to set a height limit for materials
