

3/2-way directional spool valve, direct-operated, with solenoid actuation KKDE.1

- ▶ Size 1
- ▶ Series A
- ▶ Maximum working pressure 350 bar
- ▶ Maximum flow 60 l/min

Features

- ▶ Direct-operated directional spool valve with solenoid actuation
- ▶ Mounting cavity R/T-11A
- ▶ Flow possible in both directions
- ▶ DC voltage solenoids switching in oil
- ▶ Rotatable solenoid coil
- ▶ With concealed auxiliary actuation

5) Plug-in connectors are not included in the scope of delivery and must be ordered separately, see data sheet 08006.

Functional description

General

3/2-way directional spool valves are direct operated, pressure-compensated cartridge valves. They control start, stop and flow direction, and generally consist of a housing (1) including a movably mounted bush (2), the control spool (5) as well as a return spring (4).

▼ Symbol "C"

▼ Symbol "U"

Function

In non-actuated state, the control spool (5) is kept in the initial position by the return springs (4). The control spool (5) is actuated by DC voltage solenoids (3) switching in oil. The symbols are realized by different control spools (**C** or **U**). The main ports (1), (2) and (3) can be permanently loaded with 350 bar working pressure and the flow can be directed in both directions (see symbols). The auxiliary actuation (6) enables switching of the valve without solenoid excitation. It is also available as a screwable version "N10" (7) (see page 2).

Technical data

General			
Weight	Valve	kg	0.3
	Coil	kg	0.25
Installation position			Any
Ambient temperature range		°C	−40 ... +110
Hydraulic			
Maximum working pressure	Port ①, ②, ③	bar	350
Maximum flow		l/min	60
Hydraulic fluid			See table on page 5
Hydraulic fluid temperature range		°C	−40 ... +80
Viscosity range		mm ² /s	4 ... 500
Maximum admissible degree of contamination of the hydraulic fluid Cleanliness level per ISO 4406 (c)			Level 20/18/15 ¹⁾
Load cycles			10 mil. (at 350 bar)
Electric			
Voltage type			DC voltage
Supply voltage ²⁾		V	12 DC; 24 DC
Voltage tolerance over ambient temperature			See characteristic curve on page 7
Power consumption		W	22
Duty cycle		%	See characteristic curve on page 7
Maximum coil temperature ³⁾		°C	150
Switching time according to ISO 6403 (Horizontal solenoid)	ON	ms	≤80
	OFF	ms	≤50
Maximum switching frequency		Switches/h	15000
Type of protection according to ISO 20653	Connector version "K4"		IP6K5 ⁴⁾
	Connector version "C4"		IP6K6K ⁴⁾
			IP6K9K ⁴⁾ (only with Rexroth type R901022127)
	Connector version "K40"		IP6K7 and IP6K9K ⁴⁾

Notice

For applications outside these values, please consult us!

Notice

For the electrical connection, a protective earth (PE \perp) connection is mandatory based on the specification.

1) Cleanliness levels specified for the components must be maintained in the hydraulic systems. Effective filtration prevents malfunctions and simultaneously extends the service life of the components.
We recommend a filter with a minimum retention rate of $\beta_{10} \geq 75$.

2) Additional voltages available on request
3) Due to the occurring surface temperatures of the solenoid coils, the standards ISO 13732-1 and ISO 4413 must be observed!
4) With installed and locked plug-in connector. Plug-in connectors are not included in the scope of delivery and must be ordered separately, see data sheet 08006.

Hydraulic fluid

Hydraulic fluid		Classification	Suitable sealing materials	Standards	Data sheet
Mineral oils		HL, HLP	FKM	DIN 51524	90220
Environmentally acceptable	Insoluble in water	HEES	FKM	ISO 15380	90221
	Soluble in water	HEPG	FKM	ISO 15380	90221

Notice

- ▶ Further information and details on using other hydraulic fluids are available in the above data sheets or on request.
- ▶ Restrictions are possible with the technical valve data (temperature, pressure range, service life, maintenance intervals, etc.)!
- ▶ The flash point of the hydraulic fluid used must be 40 K above the maximum solenoid surface temperature.
- ▶ **Environmentally acceptable:** If environmentally acceptable hydraulic fluids are used that are also zinc-soluble, there may be an accumulation of zinc.

Characteristic curves

Δp - q_v characteristic curve

3 ③ → ②
4 ② → ①

Notice

- The characteristic curves have been measured with HLP46, $\vartheta_{oil} = 40 \pm 5$ °C and 24 V coil.
- The performance limit was determined with solenoids at operating temperature and 10% undervoltage.

Permissible working range

▼ Voltage range and duty cycle depending on the ambient temperature
