

CytroPac Commissioning Wizard

CytroPac – Commissioning Wizard

Introduction

- With this Commissioning Tool we are starting a new era of commissioning electro-hydraulic systems
- This tool contains all needed information of the user manual and IndraWorks to make commissioning as easy and comfortable as possible
- To commission your CytroPac please start the tool and click on “Installation”. The software will guide you step-by-step through the process.
- The “Service Mode” contains additional parameters, which are usually not necessary for commissioning.
- Additional functions can also be used in the Service Mode, such as optimizing energy usage or starting the drive

CytroPac – Commissioning Tool

Advantages

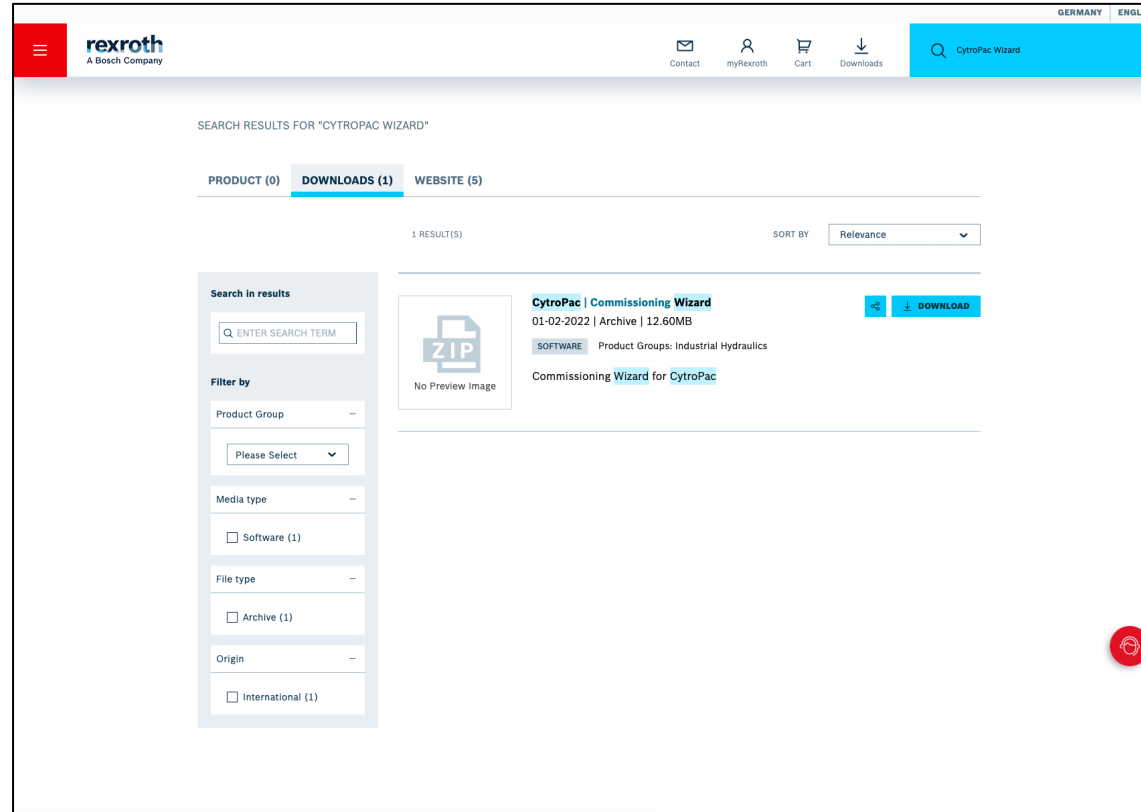

- Guided step-by-step instruction with all relevant information at the right time
- Automatic bleeding of the drive to remove oxygen in the hydraulic oil during initial start-up
- Guided setting of the pressure relief valve with detailed instruction
- Documentation of successful installation
- Working on all computers with Windows 7 or higher; 512mb RAM; 1GHz processor; 60mb disk space
- Connection via USB cable to CytroPac necessary
