

SLIDING RAIL MB ADVANCED C L30

The C-shaped sliding rail is clipped into the section profile. It guides and supports the modular belt in the lower run of the conveyor.

- ▶ Easy assembly - simply clip onto the section profile
- ▶ Secured against axial shifting with lateral screw fittings
- ▶ Lateral securing means the sliding surface does not need to be machined and abrasion and noise level are reduced
- ▶ Materials meet the requirements of EU 10/2011 and FDA CFR 21

Extend the sliding rail over the component interfaces to ensure minimum wear and noise emissions. Interruptions to the profile or component connection must be avoided. If an interruption is necessary after 10 m, the sliding rail must be attached laterally with a sheet metal screw.

Notice: After the sliding curves, an interruption is to be provided as an expansion joint in the inner curve area.

Required accessories

- ▶ Oval-head screw (3842572167)

Ordering information

Product description	Delivery unit	Material number
SLIDING RAIL MB ADVANCED C L30	1	3842572104

Technical data

Material number	3842572104
Length L (mm)	30000
Material	PE
